Expo emphasizes on energy efficient projects

TIMES NEWS NETWORK

T'puram: The International Energy Fair being held at Tagore Theatre is progressing with emphasis on energy transformation. The three-day energy fair is organized in connection with the 28th foundation day of the Energy Management Centre (EMC).

The fair is being held with the participation of various organizations working in the field of sustainable development and energy transformation. As part of the event, the inauguration of an e-cycle programme jointly implemented by EMC and Energy Efficiency Services Limited (EESL) in hospitals by EMC was held. As part of the fair, a report on the ongoing Chaitanyam project was published and a memorandum of understanding regarding the implementation of energy efficient

The fair that will conclude on Friday is organized in connection with the 28th foundation day of the Energy Management Centre

refrigeration systems in Kerala was also signed.

Experts, including those from Bhabha atomic research centre, ISRO, Centre for Study of Science, Technology and Policy (C-STEP) India Smart Grid Forum (ISGF), Energy Efficiency Services Limited (EESL), World Resources Institute (WRI), and many others are attending the panel

discussions on topics related to energy transition as part of the fair.

The energy efficiency product clinics, exhibitions about other scientific and technological fields, stalls introducing electric pressure cookers and electric bicycles have also been prepared as part of the fair. The fair will conclude on Friday.
